Dr. Mita Paunwala

The C. K. Pithawala college of engineering and technology is organizing the annual two days techno festival- INSPIRE 2020 with a great thrust and enthusiasm. Main objective of techno festival is to provide a pleasant platform for the future technocrats across the country for exchange of their ideas and to sharpen the communication skill. This year the theme of our Techfest is “Be the solution not the pollution”. In accordance with the theme, the activities have been planned by the students which provide them the opportunity to polish their intelligence and sharpen the edge of management skills with the guidance of the faculties.

INSPIRE is a platform where dynamic future technocrats come together from across the country to articulate their thoughts clearly and logically. Road map to gain practical knowledge is through such type of techno festivals. It gives hands on experience for their future professional career.

I wish INSPIRE 2020 a grand success and all the best to all the participants.
